TASK 2

You will listen to an interview to Professor Jo Boyden on education in Vietnam and India. Decide whether the following statements are true or false according to the text, and write a cross in the right column. The first one is given as an example. You will hear the recording twice. You have one and a half minutes to read the statements.

	T	F	
EXAMPLE			
0. The research has focused on children's education in developing countries.	X		✓
1. The Young Lives study shows that children in Vietnam perform very well at school.			
2. Poorer children in Vietnam have less advantages than others.			
3. Children in India always perform worse than children in Vietnam.			
4. Lately, private schools have been preferred over state schools in India.			
5. Recent researches show that Indian children have a low performance.			
6. The rate of young population is higher in India than in Vietnam.			
7. One of the main concerns now is to work on the quality of education.			
8. Children should be encouraged to use critical and analytical skills.			
9. Teaching should take into account children's dreams of their own future.			
10. We conclude from the interview that education in India is better than in Vietnam.

TOTAL (10 x 1 mark) _____ /10 marks

TASK 3

You will listen to different speakers talking about robots. Choose the statements which best match what each speaker says. There are two extra statements which do not match any of the speakers' opinions. The first one is given as an example. You will hear the recording twice. You have one and a half minutes to read the statements.

A	Different people have different interests in robotics.
B	There isn't anything interesting in the foreseeable future of robotics.
C	Robots can help us do things we aren't able to do.
D	We build humanoid robots to find out about our own nature.
E	Trying to build robots that mimic humans is useless.
F	The evolution of robotics could become dangerous for human life.
G	Many robots are already autonomous driving systems.
H	Robots can prevent deaths.
